MILLVILLE'S ENERGY PROGRAM RATE 25% BELOW WINTER BASIC SERVICE RATE

MILLVILLE, MA – Beginning with the November 2021 meter reads, the Millville Community Choice Power Supply Program will have a new supplier, NextEra Energy Services. The Town of Millville signed a thirty-six-month contract with a new rate that is twenty five percent lower than National Grid's winter Residential Basic Service price of \$0.14821 per kWh. The Program rate will be \$0.11073 per kWh.

"I'm glad to see that the Program is able to provide meaningful cost savings to our residents on their electric bills this winter," said Town Administrator Peter Caruso. "The goal of the Program is to lock in a competitive price that provides savings now and that will provide stability for the next three years."

No action is required by individual consumers. All accounts currently enrolled in the Program will remain in the Program at the new rate as of the November 2021 meter reads. This change will be noted on the November 2021 bills and will be seen on the December 2021 bills.

There are no enrollment, early termination, or cancellation fees attached to the Millville electricity program. Residents who choose to opt-out can also opt-in at a later date if they so choose at no cost. However, anyone switching from a contract with a third-party supplier may be subject to penalties or early termination fees charged by that supplier. Ratepayers should verify terms before switching.

Basic Service rates change twice a year or more, depending on rate class. As a result, the aggregation rate may not always be lower than the Basic Service rate. The goal of the aggregation is to deliver savings over the life of the program against National Grid's Basic Service. However, such savings and future savings cannot be guaranteed.
