

2023 Electric Supply Environmental Attribute Information Town of Plympton Community Choice Power Supply Program

The electric supply product you have purchased from First Point Power meets the minimum requirements of the Commonwealth's Renewable Energy Portfolio Standard.* By law, First Point Power is required to disclose to customers the following non-price information related to the product: (i) power sources; (ii) air emissions; and (iii) labor characteristics.

STANDARD POWER SOURCES - DISTRIBUTION OF RESOURCES

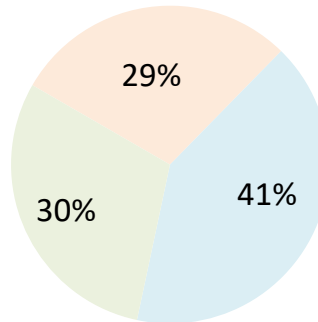

Renewable Portfolio Standard Resources	
Wind	3%
Waste to Energy	2%
Solar	6%
Biomass	1%
Other	18%
Total	30%

System Power	
Natural Gas	37%
Nuclear	12%
Oil	4%
Coal	0%
Large Hydro	5%
Other	12%
Total	70%

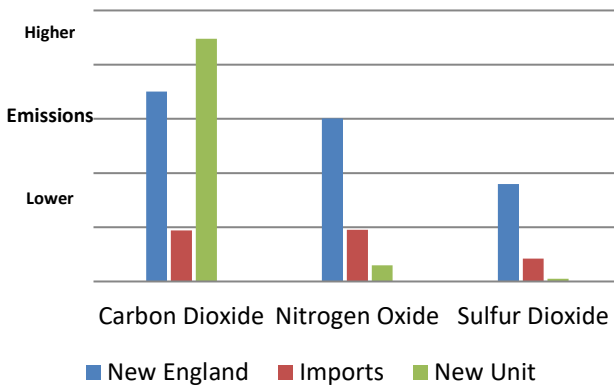

OPTIONAL POWER SOURCES - DISTRIBUTION OF RESOURCES

Renewable Portfolio Standard Resources	
RPS	30%
National Wind	41%
System Power	29%
Total	100%

Additional RECs will be purchased to meet the full Massachusetts RPS obligation.

AIR EMISSIONS

The production of electricity to support your product results in the emission of air pollutants such as carbon dioxide, nitrogen oxide, and sulfur dioxide. This graph compares the air emissions of (i) the regional system average, (ii) imports to New England, and (iii) a new natural gas power plant

LABOR CHARACTERISTICS

24% of the product's electricity came from power sources with union contracts with their employees.

NOTES

* For more information on the Renewable Energy Portfolio Standard, visit the Massachusetts Department of Energy Resources website at <https://www.mass.gov/orgs/massachusetts-department-of-energy-resources>. This label was generated on June 30, 2024.
